45 List of parameters for monitoring. 46 Read a particular block of 1 to 5 indirect parameters. Using RJ45 to connect Modbus Fieldbus is still possible, but requires modifying the value of the [Charge Cheer] F807. For security reasons and for Help ensure compliance with documented system data, only the manufacturer must run component repairs. 15 Description of the terminals. 36 Write several records (16). 11 PIN out of the open style modbus connector. 27 Configuration of the interruption of the communication. No touch. 33 Read a word (03). Obey the entire security message that follows this symbol to prevent possible injury or death. 20 Configuration of the control source. Please note the word  $\dot{A} \dot{A} \dot{C} \dot{+}$  velocity unit and adjustable as defined by the NEC. Installation, adjustment, repair and maintenance must be performed by qualified personnel. 9 Chapter 2 Hardware Setting. For more information, refer to the TSX DG KBL and: "Electromagnetic Compatibility of Industrial and Fieldbuses". 19 Configuration of communication parameters. 38 Read the identification of the device (43/14).
